Comfort Chidimma Emmanuel

Information Technology student · Frontend development & UX

Anchor University, Lagos, Nigeria

PROFILE

Information Technology student with a growing interest in frontend development, user experience, and building digital solutions that solve real problems. I enjoy turning ideas into something people can actually use: from thinking through how a product should work, to designing its interface, to bringing it to life with code. I approach software with a balance of creativity, functionality, and usability.

EDUCATION

Information Technology (in progress)
Anchor University, Lagos, Nigeria

FOCUS AREAS

- **Frontend development:** responsive, interactive web experiences with a focus on usability and clean interfaces.
- **UI/UX and product thinking:** understanding user needs and turning ideas into intuitive digital experiences.
- **Problem-solving through technology:** practical solutions that make everyday processes simpler and more efficient.
- **Collaboration and teamwork:** exchanging ideas, reviewing solutions, and contributing to products built around a shared goal.

LEADERSHIP & COMMUNITY

Commandant, Nigerian Red Cross Society, Anchor University Detachment
Coordinating activities, supporting recruitment and outreach initiatives, and working with team members toward shared objectives. This role built my skills in planning, accountability, adaptability, and listening.

STRENGTHS

Leadership · Organization · Communication · Teamwork · Learning from feedback · Writing maintainable code

WHAT I'M BUILDING TOWARD

A well-rounded technology career with a strong foundation in frontend development, user-centered design, and software problem-solving. I am looking for opportunities to contribute to meaningful projects, collaborate with experienced people, and learn from real-world challenges.
